

## Migration Services by iShift

- We bring decades of migration know-how, hands-on experience in successfully moving GBs of data, and a relentless dedication to our clients
- Cross-industry expertise and cutting-edge technology for a secure, compliant, robust, and adaptable migration
- We offer it all: data migrations from 22 source platforms to 18 target platforms

### WHAT WE DO

Analyze, design, and architect the migration process and environment. Provide full management of the migration and post-migration support

### WHAT YOU GET

Certified migration engineers with specialized migration skills. All licenses for the migration tools are included in the service

### HOW WE WORK

We use a simple but very effective approach: optimize the environment to maximize performance and shorten the migration period

# 01

## Certified Migrations Experts

Experienced engineering team with 20+ years of migration and consolidation know-how and expertise 100% focused on successful client outcomes

# 02

## World-Class Migration Tools

Our Migration team uses the proven toolset by our partner and migration technology leader Transvout to deliver data migrations quickly, securely, and cost-effectively

# 03

## Migrations Designed with eDiscovery in Mind

We will ensure your data migration aligns with your legal teams' requirements by preserving full chain-of-custody and message auditing during the process

**Migrations** require technology expertise, focus on end-user experience, and access to migration tools with enough flexibility to ensure a successful outcome. The iShift Migration team delivers a *seamless experience for your employees* and offers *post-deployment support for your internal IT admins*.

Cloud Migrations | Data Migrations | Workplace (M365) Migrations | Email & Email Archive Migrations

## Our Methodology

# 01

### Plan

Agree on the scope of the migration and define the data that needs to be moved.

# 02

### Test

Do a pilot run to ensure the integrity of the migration and validate proper data is moved.

# 03

### Migrate

Complete the migration process seamlessly with minimal disruption of operations.
