

5 Keys to Protect  
Your Business from  
**Cyberattacks**  
in 2025

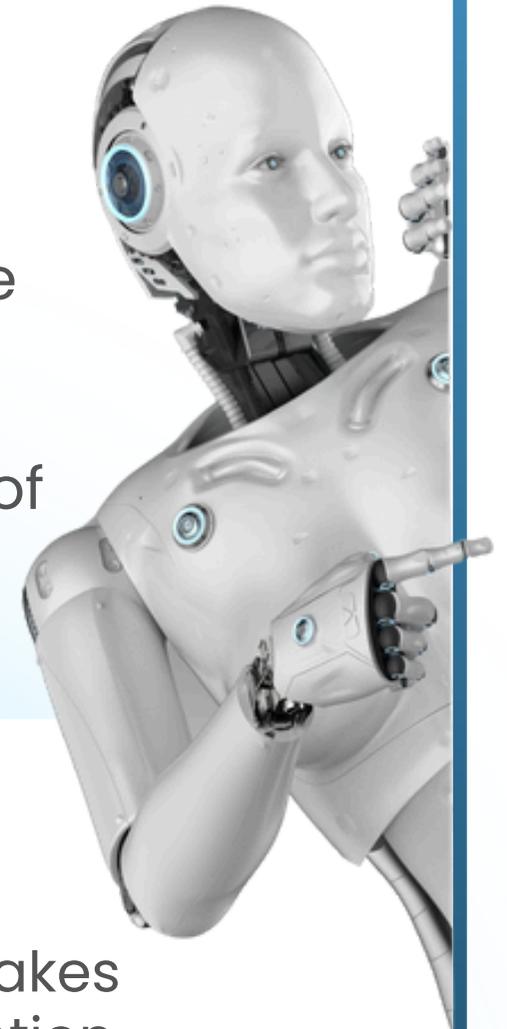

# Outsmart AI-Powered Attacks

40%

AI-GENERATED  
BEC ATTACKS

## THREAT

Cybercriminals leverage generative AI for hyper-realistic phishing, deepfake impersonations, and automated ransomware, with 40% of BEC attacks now AI-generated.

## SOLUTION

- **iComply's Live Face Match:** Combats deepfakes with biometric authentication, liveness detection, and dynamic fraud analysis.
- **vCISO Strategic AI Governance:** Guides AI risk assessments and integrates ethical AI frameworks to neutralize adversarial threats.

# Stay Ahead of Regulatory Storms

  
**200+**  
Hours/Year

## THREAT

New laws like NIS2, DORA, and SEC mandates require 200+ hours/year of compliance work, with fines up to 4% of global revenue 511.

## SOLUTION

- **vCISO Compliance Automation:** AI-powered platform streamlines audits, aligns with 20+ frameworks (GDPR, HIPAA, CMMC), and generates audit-ready reports in minutes.
- **Edge Computing for Data Sovereignty:** iComply processes KYC/KYB data locally, ensuring compliance with data localization laws.

# Secure Your Weakest Links

**60%**  
Attacks on SMEs

## THREAT

60% of ransomware attacks target SMEs in supply chains, exploiting vulnerabilities like unsecured IoT devices or outdated vendor systems

## SOLUTION

- **vCISO Vendor Assessments:** Evaluates third-party security postures and enforces zero-trust policies.
- **Predictive Maintenance Alerts:** iComply monitors IoT devices and flags anomalies in real time

# From Reactive to Unshakable

  
**2M**  
**Per Attack**

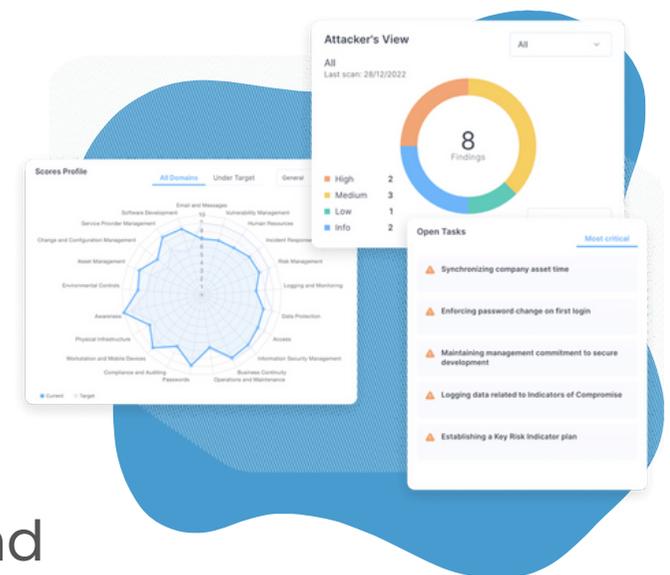

## THREAT

Ransomware costs average \$2M per attack, with 60% of SMBs shutting down within six months post-breach.

## SOLUTION

- **vCISO Incident Playbooks:** Custom response plans, tabletop exercises, and 24/7 threat monitoring.
- **AI-Powered Threat Hunting:** iShift's platform auto-detects anomalies and isolates breaches using SOAR tools

# Cybersecurity as a Growth Engine

**60%**

Attacks on SMEs

## THREAT

80% of CISOs report burnout due to evolving threats; boards demand unbiased risk evaluations

## SOLUTION

- **Strategic vCISO Advisory:** Aligns security with business goals, from AI governance to M&A risk planning.
- **Cybersecurity Culture Building:** Training programs and phishing simulations reduce insider threats by 45%
