

Modernize Your Data Infrastructure with NetApp Expertise

2026

iShift delivers high-impact **NetApp consulting services** that accelerate modernization and strengthen enterprise resilience. Clients trust us to lead complex transformations with precision, predictability, and measurable value.

Core Capabilities

End-to-End Data Migrations

We architect and execute migrations to and from NetApp environments. Our approach minimizes downtime, ensures data integrity, and supports highly regulated workloads in finance, healthcare, public sector, and manufacturing.

Technology Refresh and Modernization Roadmaps

We help organizations plan and implement storage refreshes aligned with their long-term strategy. We assess performance, capacity, risk, and lifecycle status.

Cluster Conversion and Expansion Services

We provide expert support for NetApp cluster conversion, scale-out, and reconfiguration. Our methodology reduces migration complexity and ensures alignment with NetApp best practices.

Switching and Network Integration for Storage

We design and configure the switching fabric that underpins reliable storage operations. We integrate SAN and NAS requirements into a cohesive architecture that delivers consistent performance.

New Hardware Installation and Turnkey Deployment

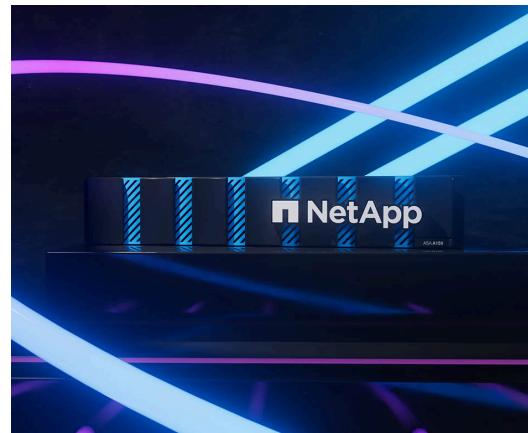

We handle full lifecycle deployment of new NetApp systems. This includes racking, cabling, configuration, cluster setup, testing, replication, and more. Clients receive a production-ready system that is optimized, validated, and fully aligned to operational requirements.

Migration Path Design and Execution

We guide clients through complex decisions around on-premises, hybrid, and cloud-based NetApp strategies. We evaluate business drivers, compliance requirements, and total cost of ownership. We then build a migration path that balances speed, safety, and ROI.

Why clients choose iShift

- Proven expertise at scale
- A repeatable and trusted framework
- Support for high-stakes environments
- A partnership mindset. We work as an extension of your team.

Modernize How Business Works. Securely, Intelligently, Together.
