

Well-Architected Cloud Governance

2026

iShift helps enterprises adopt the Cloud with confidence. Our **AI-powered NextGen Cloud Governance tool** accelerates the journey to continuous, autonomous governance at scale. Organizations gain a unified framework to automate controls, optimize cost, strengthen security, and align cloud operations with strategic outcomes.

Governance Built for Multi-Cloud

Cloud Platforms Supported: AWS, Azure, Google Cloud.

Operating Pillars: Operational Excellence, Security, Cost Optimization, Reliability, Performance Efficiency.

Core Engine: Automate · Recommend · Govern · Detect · Predict · Learn - Our engine delivers continuous oversight, actionable insights, and intelligent policy enforcement.

Governance Modules

Well-Architected Assessment

- Automated execution of assessment tasks
- Benchmark infrastructure against best practices and defined policies
- Identify improvement areas quickly to drive future-state architecture

CloudOps

- Increase operational efficiency and reliability across platforms
- Orchestrate rules and enforce governance continuously
- Reduce complexity in managing multiple services, tools, and integrations

FinOps

- Gain a unified view of multicloud usage and cost
- Surface actionable cost-saving opportunities
- Monitor accounts against guardrails to prevent overruns
- Strengthen a culture of cost accountability across teams

SecOps

- Govern security operations with proactive enforcement
- Maintain alignment with evolving regulatory and industry standards
- Get full visibility into cloud assets and risk posture
- Detect violations, mitigate quickly, and track progress over time

Why Enterprises Choose iShift

- ✓ Accelerated cloud maturity with AI-driven automation
- ✓ Continuous governance across security, operations, and cost
- ✓ Clear insights and automated actions that reduce operational burden
- ✓ Confidence in cloud decisions through ongoing recommendations and predictive intelligence

Modernize How Business Works. Securely, Intelligently, Together.
